## About **wiSHE**

*wiSHE is an integrated web application built on the latest technologies that enables an organisation to streamline and implement EHS strategies.*

With a broad range of modules, wiSHE addresses Employee Health & Safety Management, Management of Dangerous & Hazardous Materials, Waste & Recycling Management, Environmental Management & Regulatory Compliance.

wiSHE helps companies run safer by identifying, managing and mitigating workplace risks efficiently. The integrated approach adopted by wiSHE connects all disparate systems & processes into a central repository making information accessible globally and real-time.

Using simplified features, an easily deployable and light weight intuitive user interface, easily customisable screens and web based technologies leaving zero client foot print, it is now easier to record & report occupational EHS matters.

Occupational safety and health is vital to the dignity of work.

# SAFETY

*Occupational Health & Safety is an area concerned with protecting safety, health and welfare of people engaged in work. The goal of OHS program is to foster a safe and healthy work environment.*

Safety is a legal requirement in all countries for all employers to ensure health and safety of their employees. Organisations need to document how it will ensure that it meets minimum legal health & safety requirements. A number of criteria needs to be adhered to in order for the organisation to comply with the requirements. Organisations have a duty of care towards employees and other people affected by the company undertakings.

wiSHE with its number of pre-configured modules ensures the criteria is met by recording , managing and retrieving safety information on demand and in real-time. Using wiSHE practitioners can focus more on managing safety and injury prevention rather than manual data processing and producing reports from a number of disparate systems. The many modules of Safety helps organisations in

- » Set Safety targets and objectives
- » Promote effective communication organisation-wide
- » Manage regulatory compliance to legal and state requirements
- » Complying with national and international standards (OHSAS 18001, AS/NZS 4801)
- » Identify safety hazards, assess risk.
- » Ensure remedial actions required to maintain an acceptable level of safety are implemented
- » Proactively mitigate risks thereby reducing incidents
- » Provide continuous monitoring and regular assessment of the safety level achieved
- » Aims to make continuous improvement to the overall level of Safety
- » Make informed decisions using dashboards, trend charts, notifications
- » Generate reports, create user configurable ad-hoc reports

## Safety suite consists of the following modules

- Hazard Management «
- Incident Management «
- Risk Management «
- Inspections «
- Audit «
- Job Safety Analysis «
- Equipment Management «
- Document Management «
- Vendor Safety Management «

## Common features of all Safety modules

- » Automatic alerts to key users
- » Multiple drillable dashboards
- » Standard drillable reports
- » Dynamic screen management
- » Configure automatic email notification
- » Import & Export features
- » Supports i18N
- » Classification based characteristics
- » Auto fill default values – reduced data

# HEALTH

*Healthy workplaces have lower turnover, less stress and higher satisfaction.  
Take care of your body and it takes care of you.*

Occupational Health deals with all aspects of health & safety in the a workplace and has strong focus on primary prevention of hazards. The health of the workers has several determinants, including risk factors at the workplace leading to cancers, accidents, musculoskeletal diseases, respiratory diseases, hearing loss stress related disorders and communicable diseases. (WHO)

The integrated modules of wiSHE enhance employee health & safety with its complete support for industrial hygiene, safety and occupational health. wiSHE helps in tracking organisation-wide employee health records and make informed decisions on creating a healthy and conducive work atmosphere. Be it pre-employment medical assessment or on going health assessments wiSHE helps you record and track an employees health throughout their period of employment.

Record injuries to an employee with all relevant details for accurate reports and trend analysis. Using wiSHE it is easy to locate skilled first aid trained personnel, fire warden, maintain a list of medical supplies at a particular location. Only relevant authority and the concerned individual can access confidential health records.

wiSHE enables medical surveillance at your finger tips .

## Health Suite consists of following modules

- Audio metric testing «
- Vision testing «
- Blood, glucose and other pathogenic test results «
- Injury Management – Capture injury details «
- Rehabilitation Management «
- Return to work case management «
- Medical surveillance with automatic triggers for notification «
- New Employee induction «
- Complies with OSHA, ISO 18001:2008, «  
Factories Act, Work Cover etc.

## Common features of all Health modules

- » Automatic alerts to key users
- » Multiple drillable dashboards
- » Standard drillable reports
- » Dynamic screen management
- » Configure automatic email notification
- » Import & Export features
- » Supports i18N
- » Classification based characteristics
- » Auto fill default values – reduced data

# ENVIRONMENT

*We can't change the past but future we can and we should.  
Reduce, Reuse and Recycle for a better tomorrow.*

Every business no matter how small or big contributes to the degradation of the surrounding environment under which it operates. The contribution is in form of emissions, effluents and deforestation. The environmental impact can be direct or indirect but definite. A number of statutory bodies in various countries strictly monitor the environmental impact and organisations are required to operate within the control limits.

wiSHE has a number of modules to measure, monitor and analyse various environmental parameters and take necessary corrective actions. Additionally wiSHE can integrate with stack monitoring equipment for online measurement and monitoring of ambient air quality management. wiSHE's audit module can be configured to support ISO 14001:2012 international standard.

ISO 14001 sets out how an organisation can implement an effective EMS and wiSHE is an comprehensive web based integrated management system that will help in meeting the stringent requirements of the standard. With its intuitive user interface wiSHE makes it easy for the users to input, retrieve ,analyse data quickly to make informed decisions.

## Environment Suite consists of following modules

- Audio metric testing «
- Maintain Aspect/Impact Register «
- Emission Management «
- Effluent Management «
- Carbon foot print Management «
- SPM Management «
- Waste Management «
- Battery recycling «
- E-recycling «
- Support SA 8000 - CSR «

## Common features of all Environment modules

- » Automatic alerts to key users
- » Multiple drillable dashboards
- » Standard drillable reports
- » Dynamic screen management
- » Configure automatic email notification
- » Import & Export features
- » Supports i18N
- » Classification based characteristics
- » Auto fill default values – reduced data entry

## Key Features

- » **Complies with OHSAS 18001**
- » **Complies with ISO 14001**
- » **Configuration options to comply with any state, industry**
- » **Automatic workflow, notifications**
- » **Dynamic screen management**
- » **Configurable dashboards, ad-hoc reports**
- » **Supports i18N**

## Key Benefits

- » **Minimise exposure to fines and penalties**
- » **Reduce compliance costs**
- » **Enhance business reputation, CSR**
- » **Boost employee morale**
- » **Increased productivity**
- » **Promotes accountability**
- » **Closed loop communication**
